Claim Rejections - 35 USC § 112

Applicant's amendment obviates the Examiner's previous rejection, therefore the previous rejection has been withdrawn.

Allowable Subject Matter

Claims 1-29 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art of record fails to fairly teach or disclose an amine/R₃M adduct like that claimed in step (a) and there is a non-obvious difference between the ionic compounds in the prior art and the non ionic compound claimed.

US 6841498 B2, which is commonly owned and has a priority date after that of the instant application does not disclose a cyclic diene as claimed in part (c).

US 6559088 discloses dialkylmagnesium + amine with N-H bond
-> magnesium amide + Ziegler Natta + aluminum alkyl or aluminum alkoxy but does not disclose a cyclic diene as claimed in part (c).

US 6303724 B1 discloses a cyclic diene but does not disclose a dialkylmagnesium or magnesium amide compound as claimed in part (b).

US 4496660 discloses a magnesium amide compound used with triethylaluminum and titanium catalyst but does not disclose the cyclic diene as claimed in part (c).

US 4544646 discloses a magnesium amide compound used with triethylaluminum and titanium catalyst but does not disclose the cyclic diene as claimed in part (c).

Art Unit: 1755

Since none of the references above describe all of the compounds used in the catalyst system and even though the claims could be interpreted as product by process, if not all of the compounds are present the product, it cannot *de facto* be the same. There is no motivation to combine the references or use the cyclic diene in the catalyst system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
